SUMMARY

Data Analyst and Computer Science student (Decision Support & Operations Research) at Cairo University, working remotely for a UK hotel group. Build Excel and Power BI dashboards, clean and model data with Power Query and SQL, and automate manual data entry. Earlier sales experience on the Amazon Business account, working daily with US clients. Completed a data analysis diploma and a 120-hour NTI data analytics program in 2026 while working and studying.

SKILLS

Data Analysis & BI: Microsoft Excel (Power Query, Power Pivot, PivotTables, VLOOKUP), Power BI, DAX, Data Cleaning, Data Modeling (Star Schema), Dashboard Design, KPI Reporting

Databases: SQL (MySQL): CTEs, Window Functions, Joins; Microsoft Access

Automation & AI Tools: Make.com, Google Gemini, Claude

Programming (Coursework): Python (pandas, Matplotlib), C++

Office: Microsoft Word, Microsoft PowerPoint

Business: Accounts Receivable Reconciliation, Customer Segmentation, B2B Sales, Stakeholder Reporting

Languages: Arabic (Native), English (Fluent)

WORK EXPERIENCE

Data Analyst Oct 2025 – Present

Green Delta Home | Remote (UK)

- Build Excel and Power BI dashboards that track occupancy and revenue KPIs across 4 hotels for the management team.
- Update guest stay data daily, weekly, or monthly by guest type and report occupancy and contracts to the CEO.
- Built an automated ETL workflow with Make.com and Google Gemini that extracts invoice data from PDF files into structured spreadsheets, replacing manual data entry.
- Manage accounts receivable by reconciling payments from UK local councils and Booking.com against issued invoices.
- Consolidated invoices and remittance PDFs into one structured Excel workbook, making payment status easy to check by hotel and council.
- Administer HR and IT tools: Breathe HR (bulk imports, leave tracking) and company email accounts for about 20 staff.

Sales Advisor (Amazon Business Account) Dec 2024 – Oct 2025

Concentrix | B2B Sales | New Cairo, Egypt

- Handled a portfolio of 4,000+ US business contacts for Amazon Business, speaking with clients daily in English.
- Analyzed customer data to group accounts into segments and adapted the sales pitch for each, reaching up to 130% of monthly target while targets increased each month.
- Built personal Excel trackers with VLOOKUP and filters to monitor daily sales KPIs and follow-ups.

PROJECTS

Olist E-Commerce Analysis (NTI Team Project) Aug 2026

Tools: Excel, Power Query, Power BI, Python

- Cleaned 9 linked tables (96K+ orders) in Power Query and built the Power BI report in a 4-person team.
- Showed that late deliveries (8.1% of orders) cut the average review score from 4.30 to 2.56; contributed to the Python (pandas) statistical analysis.

HR Salary & Workforce Analytics (Data School Diploma Final Project) 2026

Tools: Power BI, Power Query, DAX

- Built a two-page Power BI report (Executive Scorecard, Salary & Cost) for 1,891 employees across 7 branches, with DAX measures for headcount, attrition rate, average cost, and median salary.
- Found that the lowest-paid branch had the highest attrition (16.67% vs 8.58% average), linking pay to retention.

Mexico Toy Store Sales & Inventory Analysis2026

Tools: Excel, Power Query, Power Pivot, DAX

- Modeled 5 related tables (829K sales transactions, 50 stores, Jan 2022-Sep 2023) in Power Pivot and wrote DAX measures for sales, units, and stock on hand.
- Built a dashboard covering \$14.4M in sales; found Electronics had the top margin (44.6%) and 77 stock-outs.

Sales & Profitability Dashboard2026

Tools: Excel, Power Query, Power Pivot, DAX

- Cleaned 1,194 order lines (2020-2025) in Power Query and built a star schema with a Calendar table in Power Pivot.
- Wrote DAX measures for revenue (\$6.18M), profit (\$1.61M), margin (26.05%), and year-over-year growth; added slicers for state, category, and payment mode.

SQL Data Cleaning: Global Layoffs2026

Tools: MySQL

- Cleaned a 2,361-row layoffs dataset in a staging table: removed duplicates with ROW_NUMBER() in a CTE and converted text dates with STR_TO_DATE().
- Filled missing industry values with a self-join, standardized company and country names, and dropped rows with no layoff figures.

EDUCATION

Bachelor of Science in Computer Science (Decision Support & Operations Research)Expected 2028

Faculty of Computers and Artificial Intelligence, Cairo University

Relevant Coursework: Operations Research, Decision Support, Database Systems

TRAINING

Advanced Data Analytics (120 hours), NTI & ITIDAJul 2026 – Aug 2026

Data Analysis Diploma, Data School2026

CERTIFICATIONS

- Microsoft Office Specialist Expert: Word 2016 (Feb 2020)
- Microsoft Office Specialist: Access 2016 (Feb 2020)
- Microsoft Office Specialist: PowerPoint 2016 (Feb 2020)
- Microsoft Technology Associate (MTA): Database Administration Fundamentals (Feb 2020)

LEADERSHIP & ACTIVITIES

President | Star Union (student technical activity, FCAI)2024 – Present

- Lead a student organization of about 180 members; all committee heads report to the president.
- Plan technical workshops, training sessions, and recruitment interviews with the executive board.

Head of Public Relations | Minders (student activity)2022 – 2024

- Led the PR team that contacted partners and speakers for campus events such as First Step.
